JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY

Vol. 273 Nos. 1 + 2 November 24, 1989

CONTENTS

Elucidation of electrochemical mechanisms by impedance spectrometry. Part I. Simultaneous simulation of a set of spectra (SSSS) applied to reactions with chemisorbed intermediates
G. Sailé (Berlin, G.D.R.) 1

Elucidation of electrochemical mechanisms by impedance spectrometry. Part II. Chemisorption and partial charge transfer in the Bi(Hg)/Bi(III) reaction in the presence of chloride ions
G. Sailé (Berlin, G.D.R.) 31

Electron and molecular effects in the double layer for the metal/electrolyte solution interface
M.B. Partenskii and V.J. Feldman (Sverdlovsk, U.S.S.R.) 57

Linear sweep voltammetry at tubular electrodes. Part IV. Catalytic reactions
J. Dutt, J. Chhabra (Chadigarh, India) and T. Singh (Ludhiana, India) 69

Probing electrocrystallization of charge transfer salts with the quartz crystal microbalance
M.D. Ward (Wilmington, DE, U.S.A.) 79

Kinetics of an amperometric glucose sensor with a soluble mediator
K. Yokoyama, E. Tamiya and I. Karube (Tokyo, Japan) 107

Current-doubling, chemical etching and the mechanism of two-electron reduction reactions at GaAs. Part 1. Experimental results for H_2O_2 and Br_2
B.P. Minks, G. Oskam, D. Vanmaekelbergh and J.J. Kelly (Utrecht, The Netherlands) 119

Current-doubling, chemical etching and the mechanism of two-electron reduction reactions at GaAs. Part 2. A unified model
B.P. Minks, D. Vanmaekelbergh and J.J. Kelly (Utrecht, The Netherlands) 133

Electrochemistry in near-critical and supercritical fluids. Part 8. Methyl viologen, decamethylferrocene, $Os(bpy)_3^{2+}$ and ferrocene in acetonitrile and the effect of pressure on diffusion coefficients under supercritical conditions
C.R. Cabrera and A.J. Bard (Austin, TX, U.S.A.) 147

Direct demonstration of the propagation theory of a conductive zone in a polypyrrole film by observing temporal and spatial variations of potentials at addressable microband array electrodes
Y. Tezuka and K. Aoki (Yokohama, Japan) 161

A re-examination of the mechanism of electrodeposition of CdX and ZnX (X = Se, Te) semiconductors by the cyclic photovoltammetric technique
K.K. Mishra and K. Rajeshwar (Arlington, TX, U.S.A.) 169

Metal voltammetry at dioleoyl lecithin (di-O-PC) coated mercury electrodes: Cd, Cu, Eu, Pb, V and Zn and the effect of electrolyte composition
A. Nelson (Plymouth, Great Britain) and H.P. van Leeuwen (Wageningen, The Netherlands) .. 183

Metal voltammetry at dioleoyl lecithin (di-O-PC) coated mercury electrodes: effect of organic complexing agents on Cd voltammetry
A. Nelson (Plymouth, Great Britain) and H.P. van Leeuwen (Wageningen, The Netherlands) .. 201

Transport numbers in PVC based membranes from diffusion potential measurements
R.D. Armstrong, W.G. Proud and L. Starforth (Newcastle upon Tyne, Great Britain) 209

Electrochemical adsorption and phase formation of TlBr and TlI on Tl(Hg)
M.I. da Silva Pereira, M.J.B.V. Melo (Lisbon, Portugal) and L.M. Peter (Southampton, Great Britain) 215

Use of different electropolymerization conditions for controlling the size-exclusion selectivity at polyaniline, polypyrrole and polyphenol films
J. Wang, S.-P. Chen and M.S. Lin (Las Cruces, NM, U.S.A.) 231

An iterative least squares method for the identification of electrochemical impedances
R.H. Milocco (La Plata, Argentina) 243

Short communications

The electrode processes of selenocyanate complexes of Fe(II) and Co(II) on mercury electrodes
K. Winkler and T. Krogulec (Bialystok, Poland) 257

(*continued on p. 3 of cover*)

Contents (*continued*)

Voltammetric behaviour of a Pt electrode in concentrated aqueous solutions of LiCl
K. Tanaka (Saitama, Japan) and R. Tamamushi (Fukushima, Japan) 265

Local heat effects by electrolysis of heavy water
S.K. Ratkje and B. Hafskjold (Trondheim, Norway) 269

Preliminary notes

Surface morphology and reactivity of the Pt-SPE electrode. SEM, STM and electrochemical characterization
K. Uosaki, J. Wang and H. Kita (Sapporo, Japan) 275

Use of Nafion coatings on glassy carbon electrodes as localized sources of protons for electrogenerated radical anions in acetonitrile
M.S. Mubarak (Abha, Saudi Arabia) and D.G. Peters (Bloomington, IN, U.S.A.) 283

Submission of an article for publication is understood to imply that the article is not being considered for publication elsewhere. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination.

For Material Subject to U.S. Copyright Law.

Special regulations for readers in the U.S.A.—This journal has been registered with the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, U.S.A. Consent is given for copying of articles for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition that the copier pay through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1980 may be copied for a per-copy fee of US$2.25, also payable through the Center. (N.B. For review articles this fee is US$0.20 per copy per page.) This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.
